Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 16 is objected to because of the following informalities:

In claim 16, line 10, the word "an" should be changed to --a--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the flexible fingers" in line 11-12. There is insufficient antecedent basis for this limitation in the claim since the independent claims give no indication that the previously recited cantilever fingers are flexible.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3617

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1, 8 are rejected under 35 U.S.C. 102(e)(1) as being anticipated by Eikhoff et al (US 6,402,254).

Claims 1, 8

Eikhoff et al disclose a wheel cover assembly comprising a plurality of lug nuts (20) each having a flange (24); a wheel cover (12) adapted to cover the central portion of a wheel and the lug nuts; a plurality of elongated tubular extensions (54) extending axially from said wheel cover for attaching the wheel cover to the lug nuts of the wheel, each elongated tubular extension including a plurality of axial slots between them as seen in fig. 3, and 5 subdividing the extension into a plurality of cantilevered fingers adapted to engage the flange of a respective lug nut to retain said wheel cover to said wheel; means for retaining (64) disposed within said wheel cover, said means for retaining being adapted to engage a portion of each of said plurality of elongated tubular extensions as shown in fig. 5, said means for retaining being configured to radially support some of the flexible fingers (54) and to bias said some of the flexible fingers into engagement with said lug nuts; and means (34) for locating said retaining means, said means for locating extending axially from said wheel cover and disposed between said

Art Unit: 3617

plurality of elongated tubular extensions, whereby said flexible fingers assisted by said retention means snap fit into engagement with said lug nuts such that said wheel cover assembly is removably attached to said wheel.

Allowable Subject Matter

6. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 9-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Spisak and Nielson et al are cited to related wheel cover comprising extending fingers with support.
